Did you know the word "whisky" is derived from the original Gaelic 'uisge beatha' and dates back to the 15th century in Ireland and Scotland. The original Gaelic word translates to "water of life". Throughout the years, the word itself has evolved and so has the production and the whisky itself in many different parts of the world. In this flight, you will get to enjoy whiskies from Scotland, Ireland, South Africa and England

Through the peat tour, understand how distilleries control the PPM (Phenol Parts per Million) levels of their malt and use further techniques to balance the smoke with sweetness. You might just discover the right amount of peat levels that you love from your whisky.
